

A web-based interactive solution for monitoring and taking action on Bureau Circulars. MyCircularActivity.com captures a complete timeline of workflow.

### MyCircularActivity.com

MyCircularActivity.com was designed as the premier technology replacement for outdated bureau circular tracking methods throughout the industry. Historically companies have utilized Excel, Access, Email and other methods to track and manage bureau activity causing major compliance issues and millions of dollars in fines from DOIs.

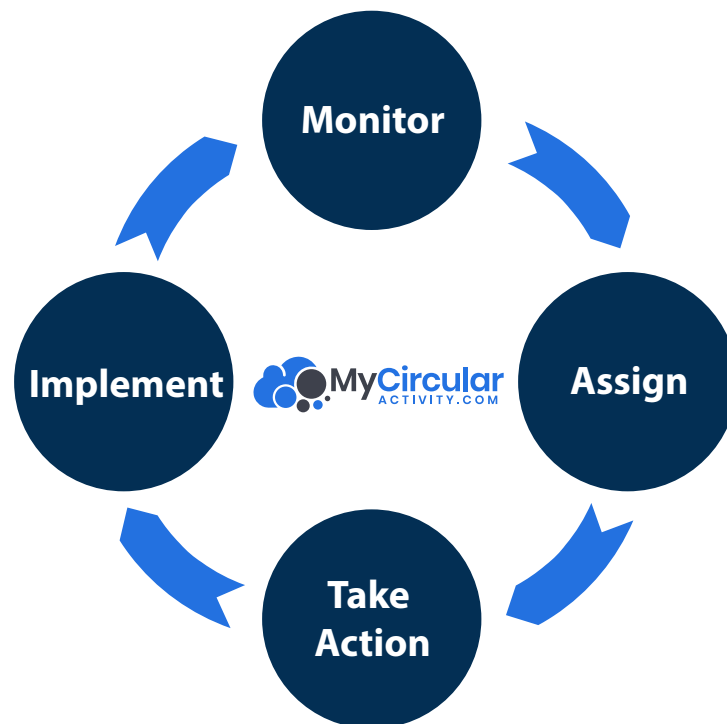

Our compliance and technology teams have spent years developing a software that works as a workflow management tool, keeps everything in a single repository, and can stand the test of a market conduct exam.

### Historical Data

Through innovative technology processes, we have developed a seamless way to import historical data from a variety of platforms. This allows companies to pick up right where they left off and simplify implementation.

### Strategic Alliances

Through strategic alliances with Rating Bureaus, M&C is provided with direct access to Circulars, allowing for the most efficient monitoring, assessment and management of information.

### Feature Highlights

**View** Circular information from various Bureaus including an Overview and Company Action

**Edit** fields specific to your company to track the entire workflow

**Assign** Circulars to individuals/Departments generating automated e-mail alerts

**Track** progress through company comments and fully customizable activities

**Search/Filter** on both Bureau and company-specific information

**Import** Historical company data

**Export** PDF, XLS, and/or CSV format reports (useful for market conduct)

**Store** all Circulars and related company action in a single repository

**Link** PDFs of filings submitted in response to Circulars
