

## The Only State Filing Hosting And Management Tool You'll Need

### OneView

With the goal of streamlining and improving the management of your state filings we developed **OneView**. In 2019, we redesigned our legacy state filing management solution of 10 years to provide companies a better way to manage all of their state filings in a single repository. As a data hosting solution, OneView is the most user-friendly and cost effective tool in the industry.

### Forms Library

The Premier licensing level includes a **Forms & Rate/Rule Library** based on historical filing data. This provides the ability to search for forms that are applicable by state, product, line of business, form version, etc. Users can efficiently identify forms for proper usage as well as system validation and underwriting.

### Historical Filings

The OneView team will collaborate with your team and leverage our proprietary extraction tool to integrate all historical company SERFF, I-File, IRFS & Paper filings into a single repository regardless of SERFF instance.

### Company Dashboard

Designed to provide a snapshot of all filings in progress and approved

### Form & Rate/Rule Library

Historical library of policy forms, endorsements, and rate/rules for all products.

### Project Tracking

Monitor activity from submission to disposition and receive email alerts on status changes

### Web-based

Data stored in an IaaS cloud based SSAE 18 compliant server

### What's New!

- Forms library
- 
- Customizable reports
- 
- Searchable filing details
- 

Historical uploads from any SERFF instance
